Customer Reviews

Rated 5/5 - Very cool looking screen

Very cool looking screen piano gloss black beautiful slick lines and brilliant with Hi-def content. My only gripe would be I think it struggles to up-scale standard definition content. Tip - buy one as it is a fantastic screen and feed it as much hi def as possible!

[Justin Taffe - 01/04/2007]

Rated 5/5 - TV is about picture quality

This tv is about picture quality, and the better the input the better the image my SKY HD works amazing on it and my ps3 is awesome, i got this tv what a bargain 42 inch 1080p lcd tv i love it, 2 words, BUY IT

[Paul Calv - 31/03/2007]

Rated 5/5 - Wow!

These televisions are about picture quality, and the better the input the better the image my SKY HD movie was awesome ! and to think this TV is 1080P ready..WOW ! I can,t wait to get a HDDVD or Blue ray . my only fault is the sound quality.speech does get drowned ouy by music on some programs ..so i may invest in surround system speakers.

[Glen Smith - 17/03/2007]

Rated 5/5 - Great specification and quality

Great specification, quality and online price. Have connected it up to a Mac Mini at 1080p resolution.

[Andy Jenkins - 15/01/2007]

Rated 5/5 - Very very good picture quality

very very good picture quality even ordinery sky digital transmition looks stunning and detail is almost like HD. Nice feature and audio.PIP is missing thats a shame.
